

ZELT

Nowadays in the time of haste and overload of information, returning to one's roots, nature and its gifts is as precious as gold (*zelt(s)* in Latvian).

ZELT Sea Buckthorn, grown and produced in Latvia, is unique – Sea Buckthorn products rich in vitamins, amino acids and antioxidants are created to boost health and immunity, maintain beauty and healthy skin, as well as for cooking purposes. The 24 ha, spacious ZELT Sea Buckthorn Garden, is located in the district of Jelgava, Platone Municipality, on the banks of the River Platone. We are only cultivating one species of Sea Buckthorn shrub with an increased amount of oil in the berries. Each Sea Buckthorn shrub is grown with care and responsibility, and each product is created with a high sense of quality, including a totally zero-waste manufacturing process.

Our work, and the natural and valuable ZELT Sea Buckthorn products, are based on true enthusiasm, inspiration and love. We believe in the unique characteristics of these gifts of nature and we want to grant this magical feeling to everyone: how the bright sourness of Sea Buckthorn makes one slightly close their eyes in satisfaction.
